Last summer I purchased an EZ-DRIVER set to use in my transmission & exhaust business.

After a couple weeks of using the EZ-DRIVER it occurred to me that after 30 plus years in the automobile industry, someone finally designed a driver set with me and my type of work in mind!!

I have found this set to be very high quality and just right dimensionally. The ability to lengthen the driver to that " just right " length makes this tool an efficient and cost effective part of my business.

If you want to eliminate wasted time searching for the right driver then I would highly recommend adding a EZ-DRIVER set to your tool chest.

Thanks Again EZ-DRIVER for making a great tool !
